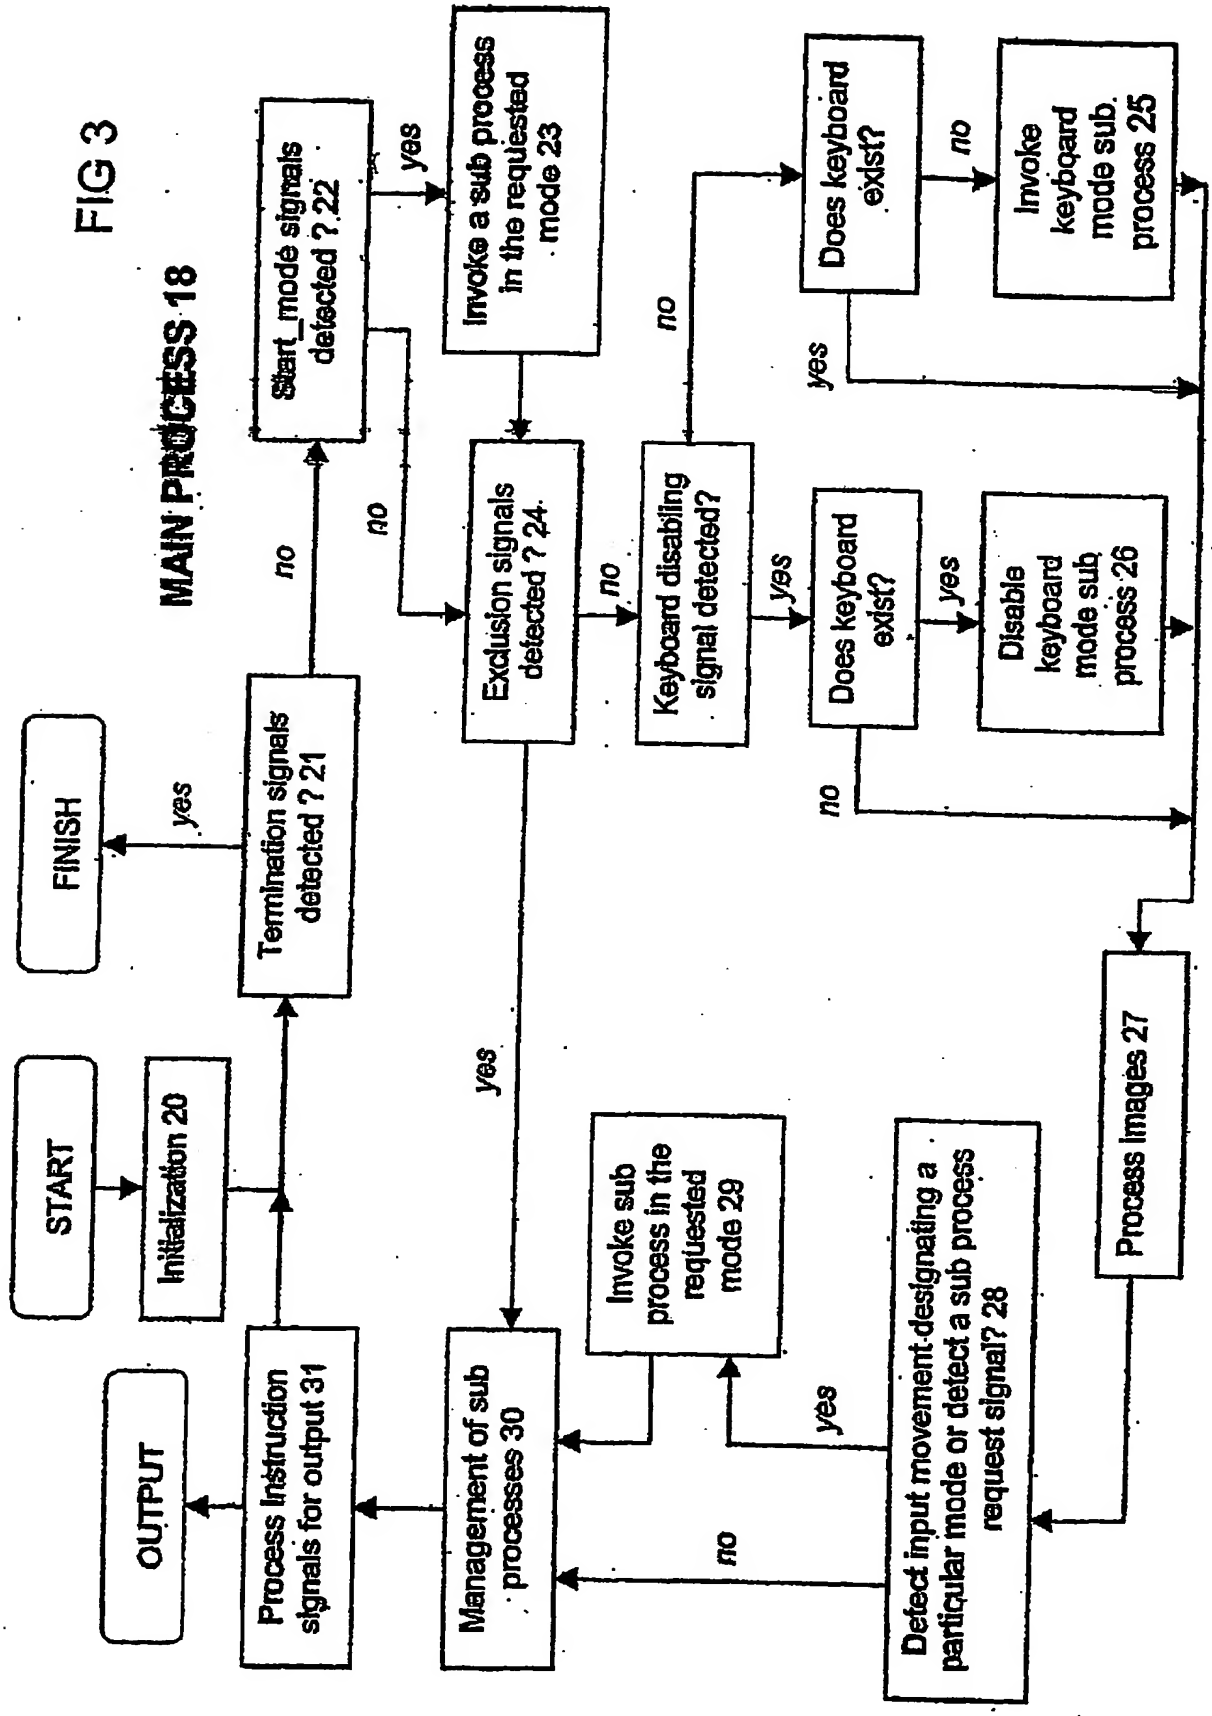
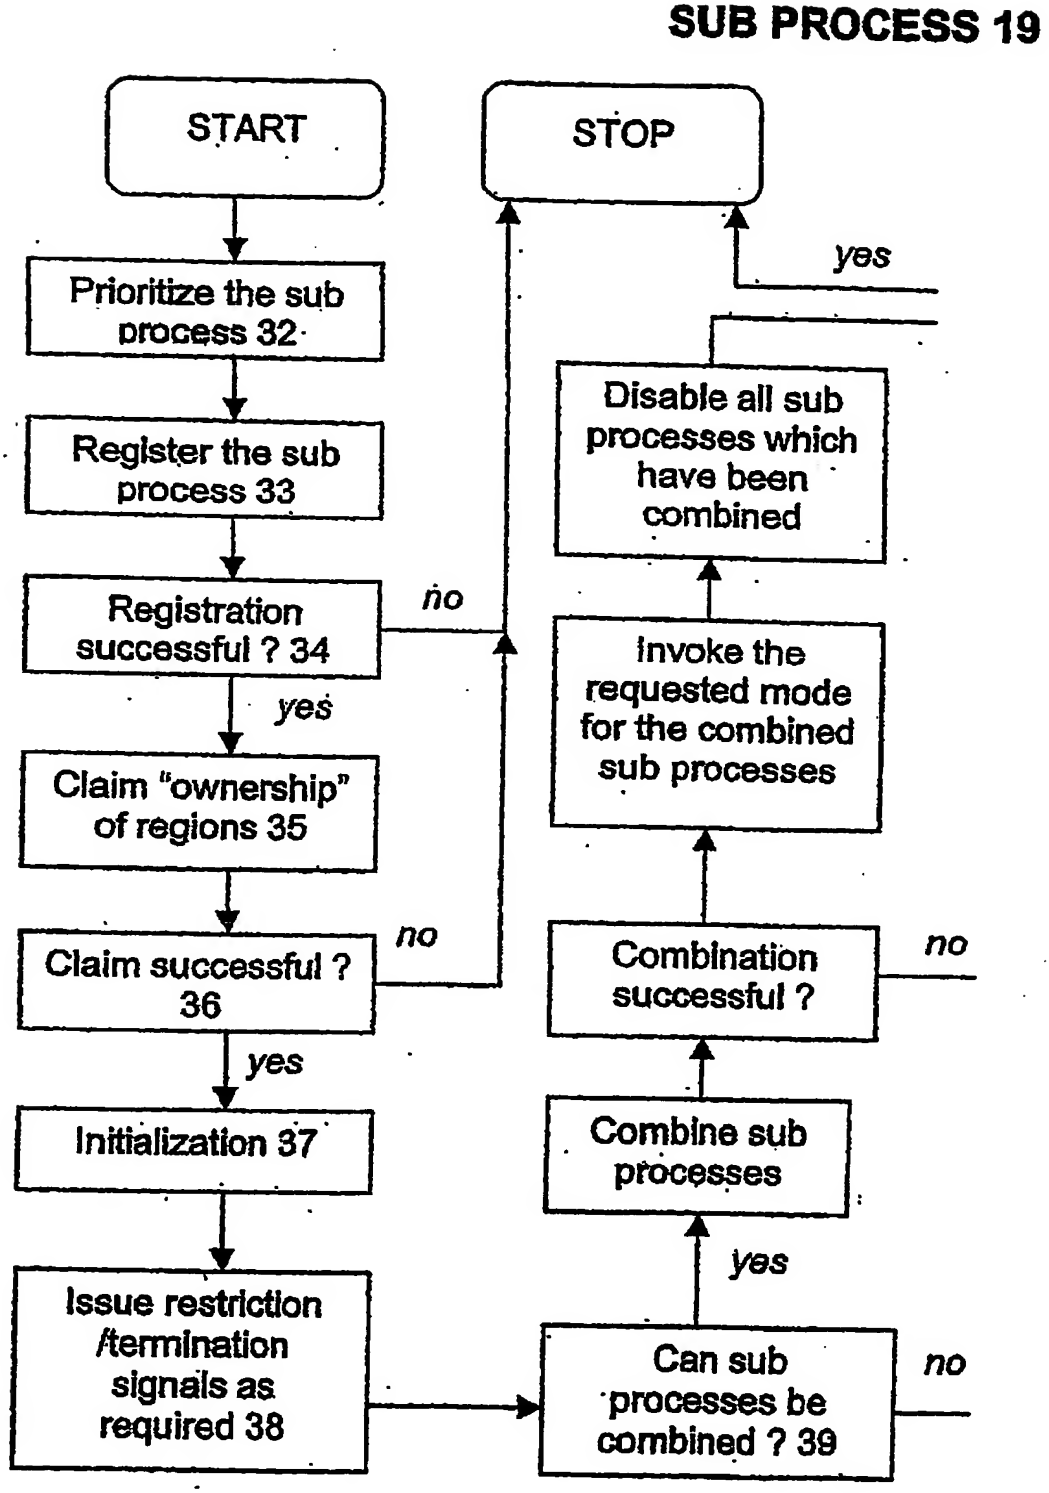
FIG 3

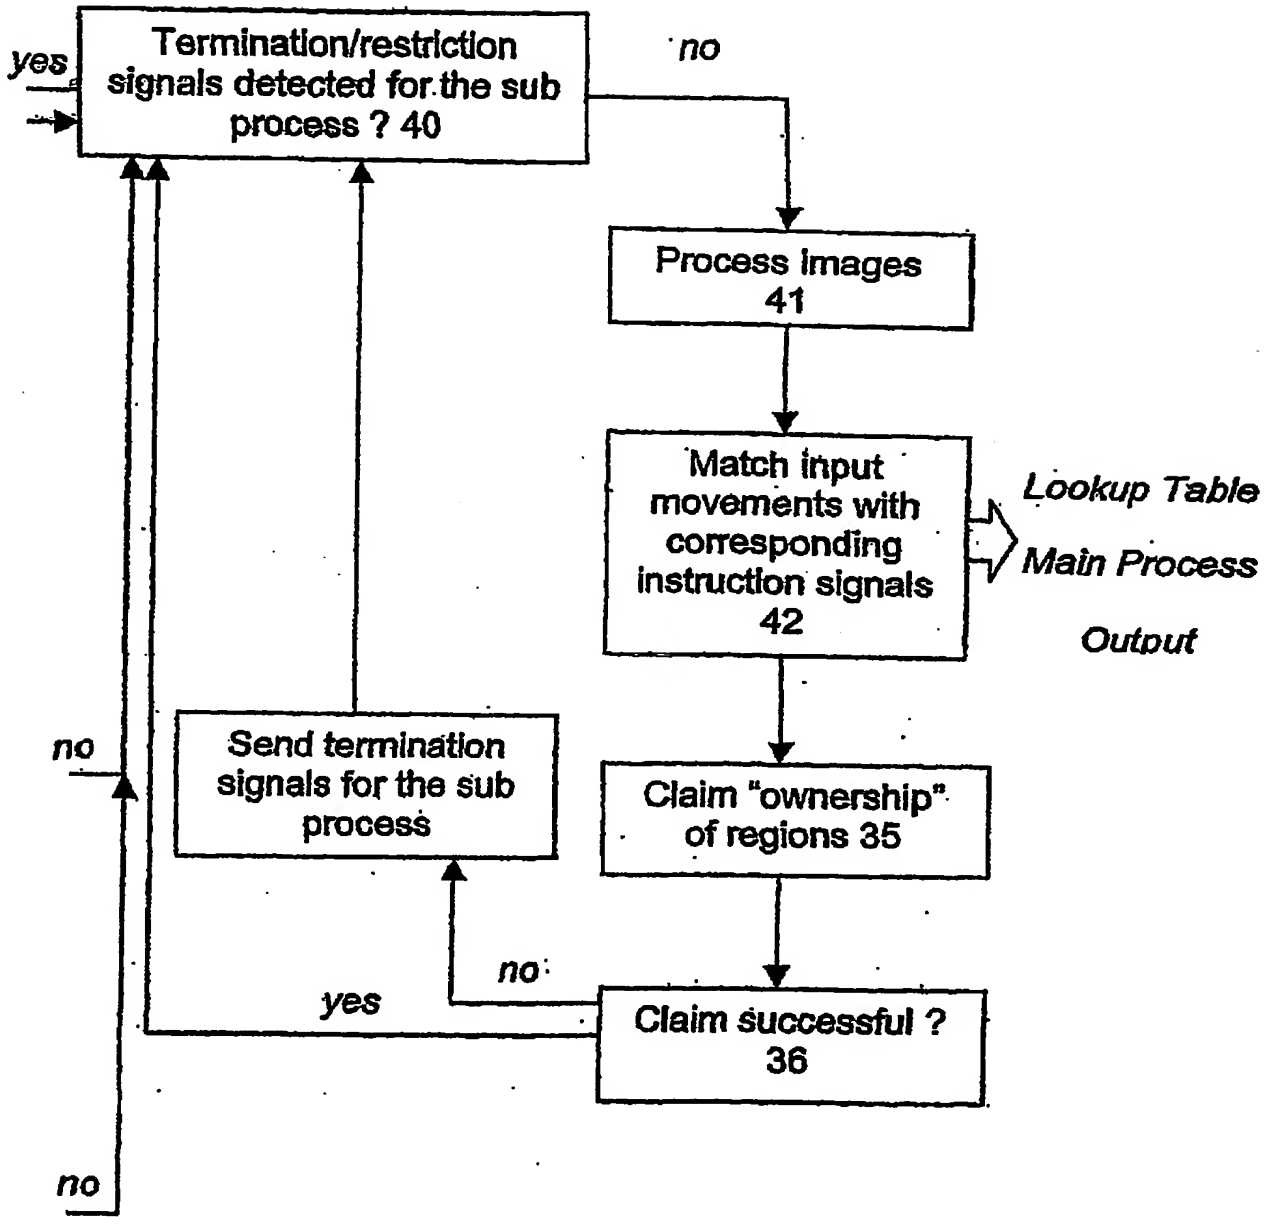


MAIN PROCESS 18
START
Initialization 20
FINISH
yes
Termination signals detected ? 21
no
Start_mode signals detected ? 22
yes
Invoke a sub process in the requested mode 23
no
Exclusion signals detected ? 24
no
Keyboard disabling signal detected?
yes
Does keyboard exist?
yes
Disable keyboard mode sub process 26
no
Does keyboard exist?
no
Invoke keyboard mode sub. process 25
yes
yes
Process Images 27
Detect input movement designating a particular mode or detect a sub process request signal? 28
yes
no
Invoke sub process in the requested mode 29
Management of sub processes 30
Process instruction signals for output 31
OUTPUT



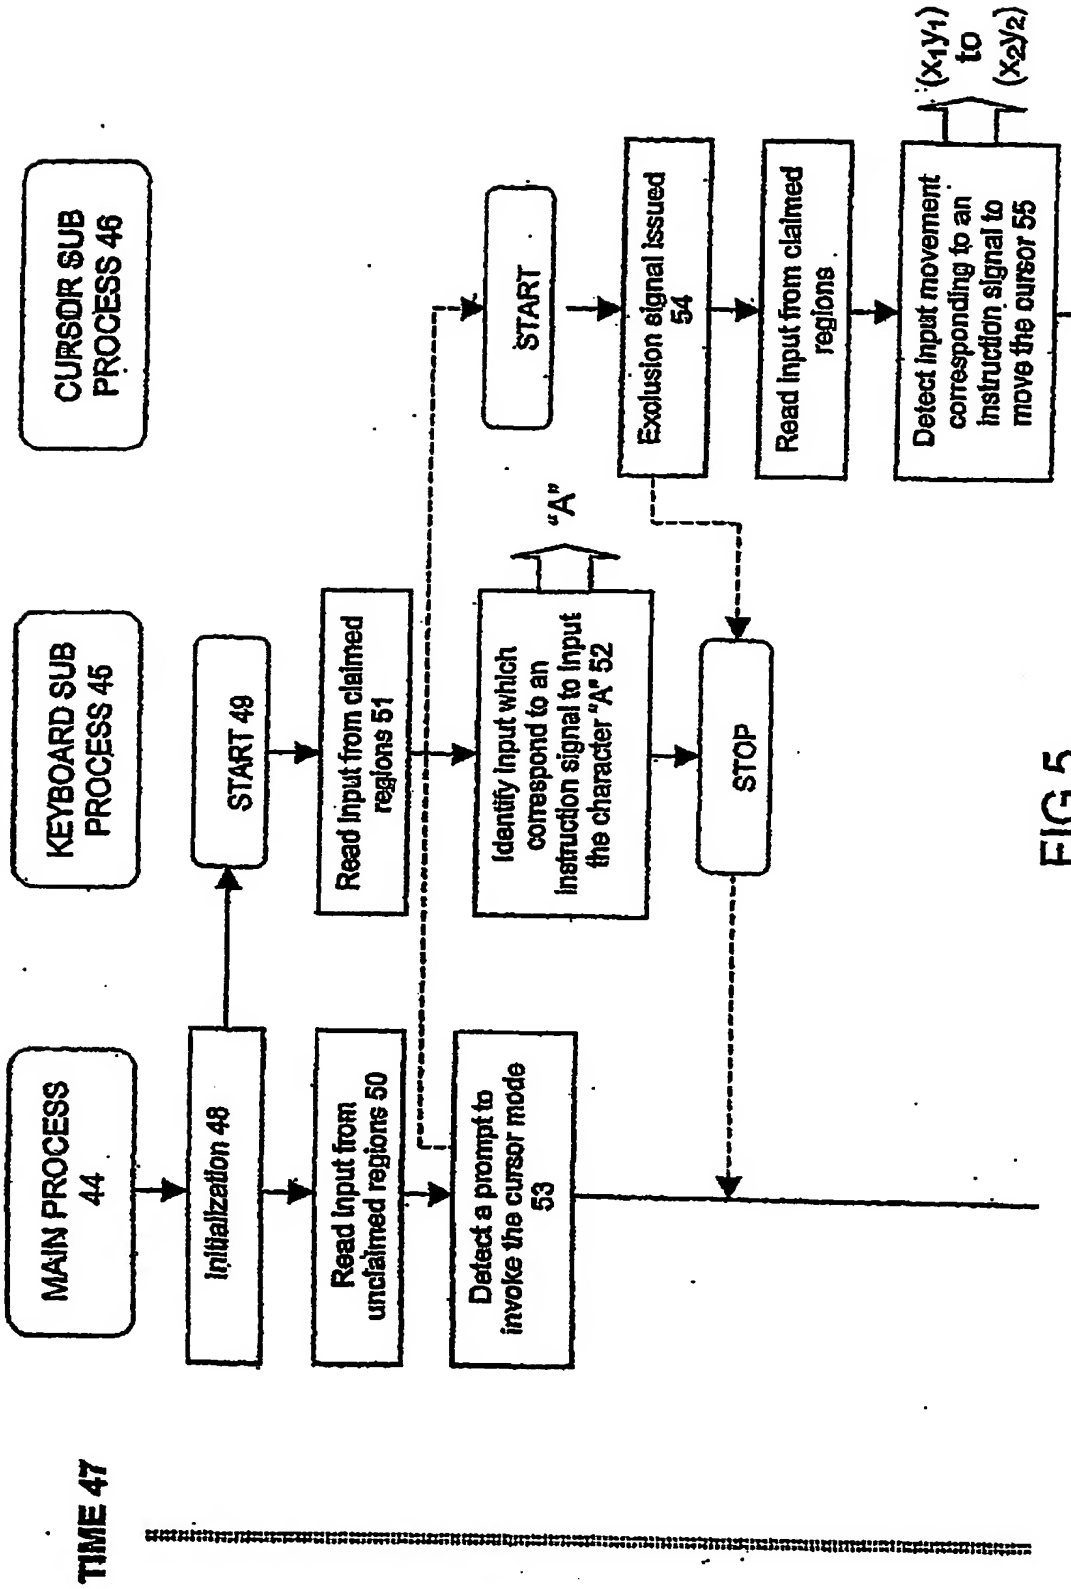
SUB PROCESS 19
START
Prioritize the sub process 32
Register the sub process 33
Registration successful ? 34
no
yes
Claim "ownership" of regions 35
Claim successful ? 36
no
yes
Initialization 37
Issue restriction /termination signals as required 38
STOP
yes
Disable all sub processes which have been combined
Invoke the requested mode for the combined sub processes
Combination successful ?
no
Combine sub processes
yes
Can sub processes be combined ? 39
no

FIG 4



Termination/restriction signals detected for the sub process ? 40
yes
no
Process images 41
Match input movements with corresponding instruction signals 42
Lookup Table
Main Process
Output
Claim "ownership" of regions 35
Claim successful ? 36
no
yes
Send termination signals for the sub process
no
no

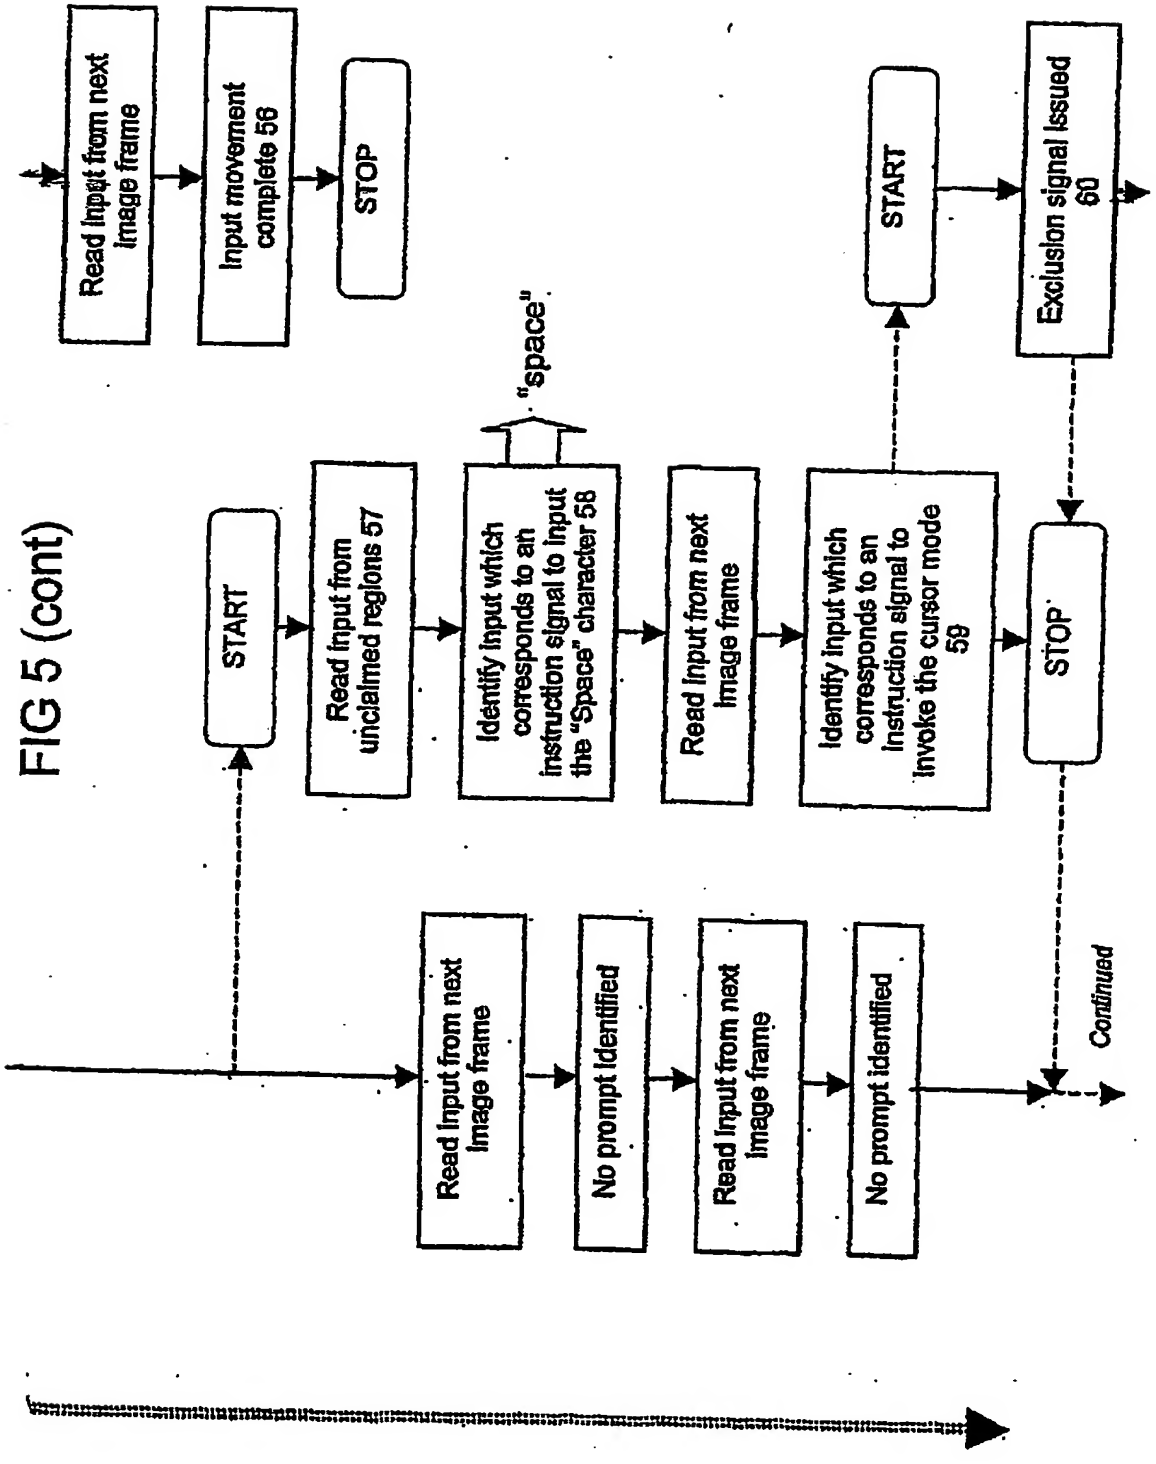
FIG 4 (cont)



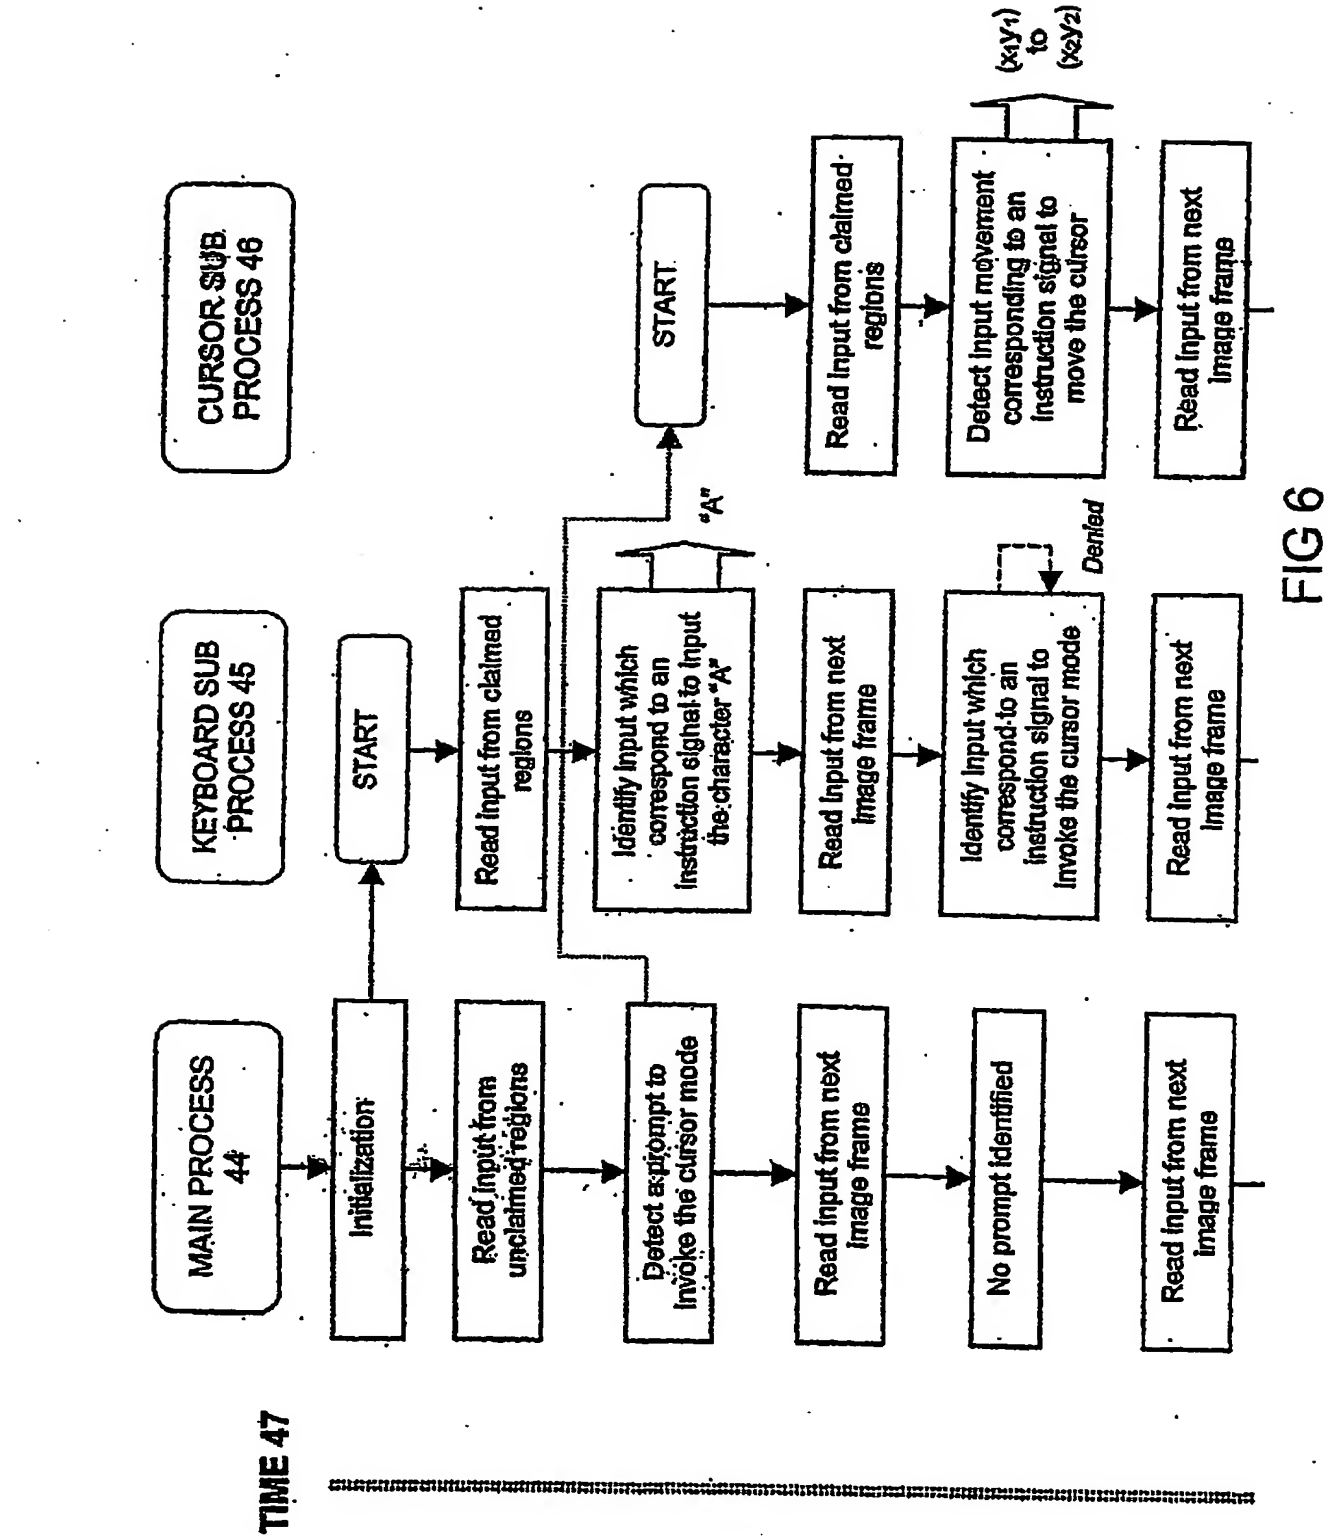
TIME 47
MAIN PROCESS 44
KEYBOARD SUB PROCESS 45
CURSOR SUB PROCESS 46
Initialization 48
START 49
Read input from unclaimed regions 50
Read input from claimed regions 51
Detect a prompt to invoke the cursor mode 53
Identify input which correspond to an instruction signal to input the character "A" 52
"A"
STOP
START
Exclusion signal issued 54
Read input from claimed regions
Detect input movement corresponding to an instruction signal to move the cursor 55
(x_1y_1) to (x_2y_2)

FIG 5

FIG 5 (cont)



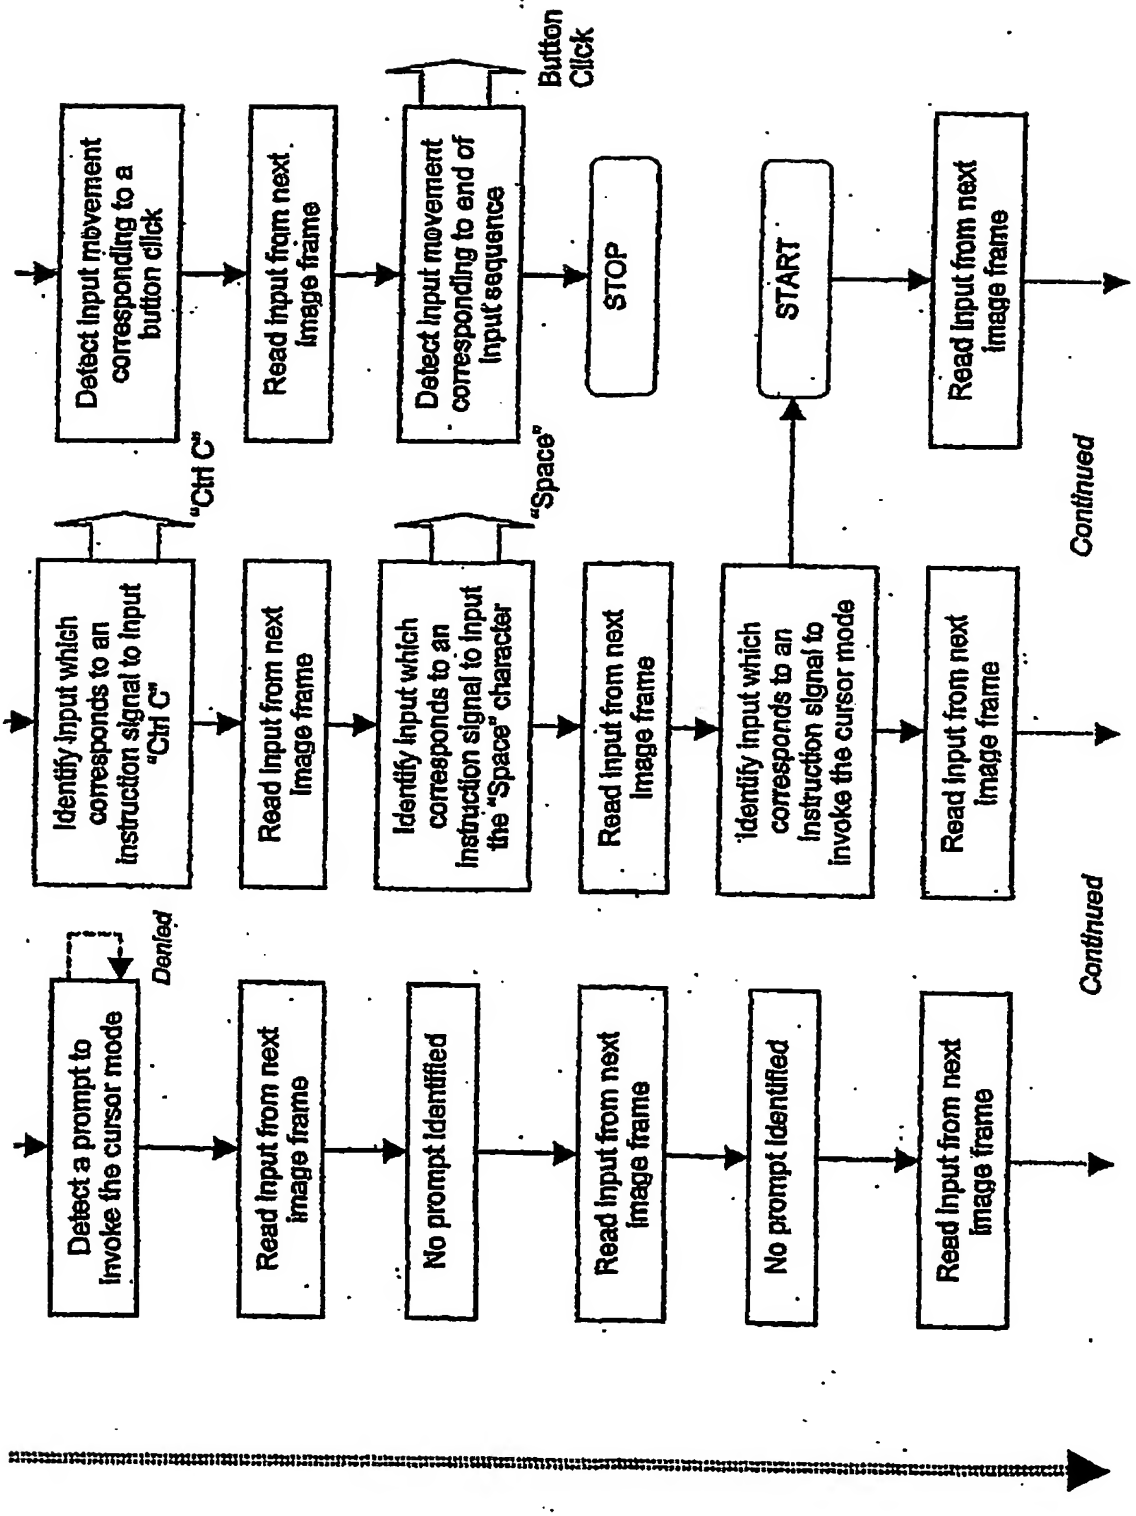
Read input from next image frame
Input movement complete 56
STOP
START
Read input from unclaimed regions 57
Identify input which corresponds to an instruction signal to input the "Space" character 58
"space"
Read input from next image frame
Identify input which corresponds to an instruction signal to invoke the cursor mode 59
START
Exclusion signal issued 60
STOP
Read input from next image frame
No prompt identified
Read input from next image frame
No prompt identified
Continued



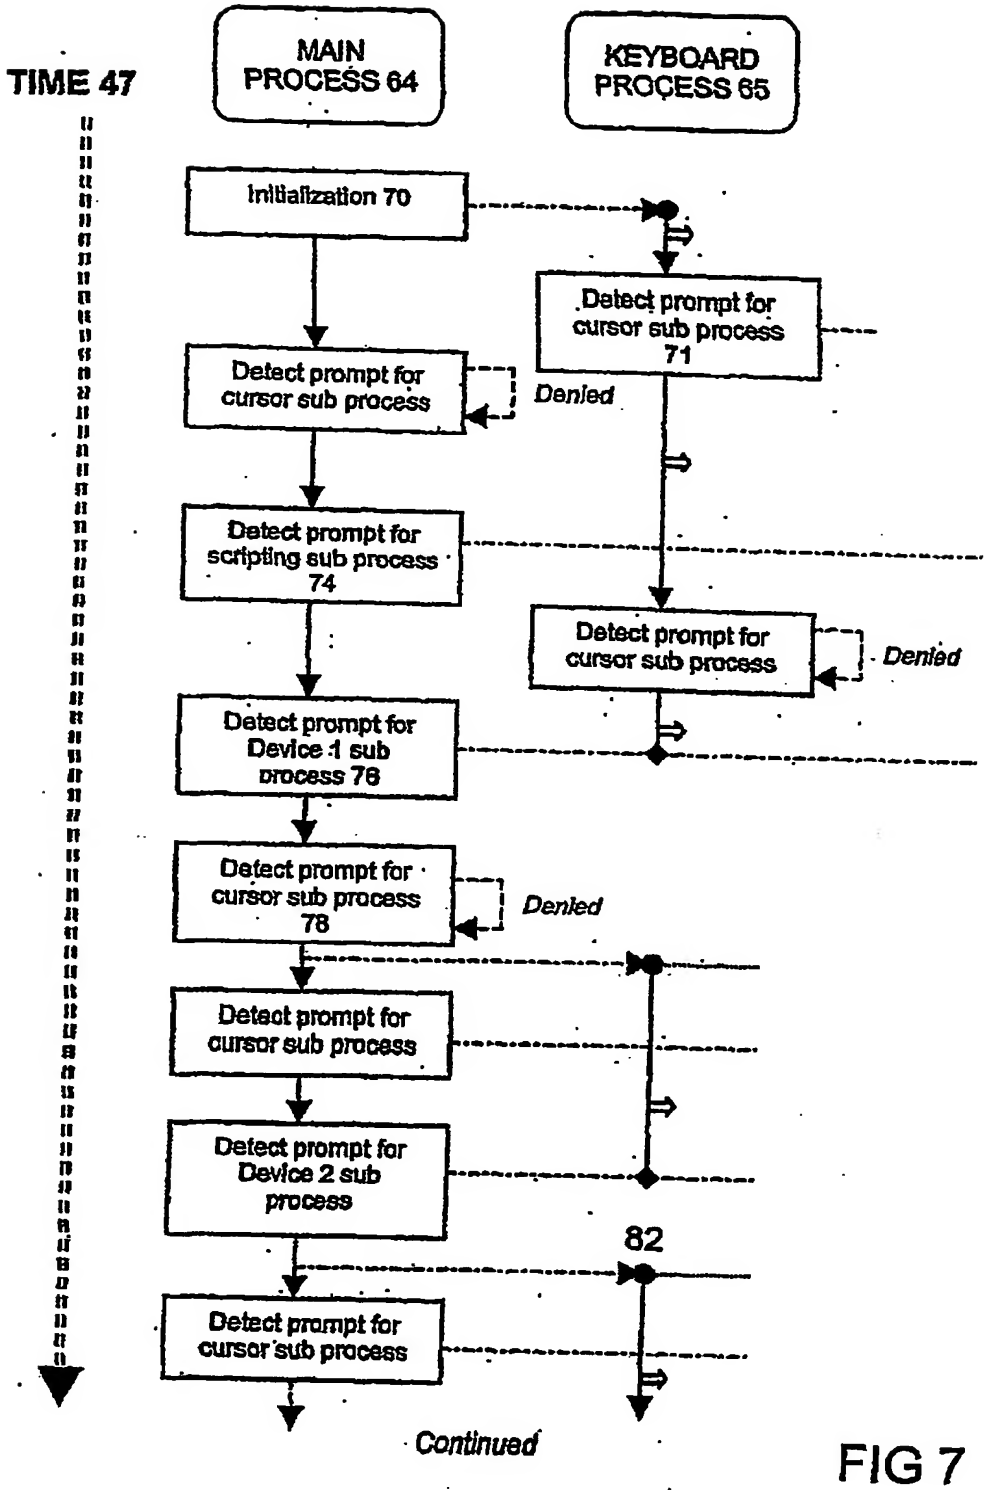
MAIN PROCESS 44
KEYBOARD SUB PROCESS 45
CURSOR SUB PROCESS 46
TIME 47
Initialization
START
START
Read input from unclaimed regions
Read input from claimed regions
Read input from claimed regions
Detect prompt to invoke the cursor mode
Identify input which correspond to an instruction signal to input the character "A"
"A"
Read input from next image frame
Read input from next image frame
Read input from next image frame
Identify input which correspond to an instruction signal to invoke the cursor mode
Denied
Detect input movement corresponding to an instruction signal to move the cursor
(x1y1) to (x2y2)
No prompt identified
Read input from next image frame
Read input from next image frame

FIG 6

FIG 6 (cont)



Detect a prompt to invoke the cursor mode
Denied
Read input from next image frame
No prompt identified
Read input from next image frame
No prompt identified
Read input from next image frame
Continued
Identify input which corresponds to an instruction signal to input "Ctrl C"
"Ctrl C"
Read input from next image frame
Identify input which corresponds to an instruction signal to input the "Space" character
"Space"
Read input from next image frame
identify input which corresponds to an instruction signal to invoke the cursor mode
START
Read input from next image frame
Continued
Detect input movement corresponding to a button click
Button Click
Read input from next image frame
Detect input movement corresponding to end of input sequence
STOP



TIME 47
MAIN PROCESS 64
KEYBOARD PROCESS 65
Initialization 70
Detect prompt for cursor sub process 71
Detect prompt for cursor sub process
Denied
Detect prompt for scripting sub process 74
Detect prompt for cursor sub process
Denied
Detect prompt for Device 1 sub process 76
Detect prompt for cursor sub process 78
Denied
Detect prompt for cursor sub process
Detect prompt for Device 2 sub process
82
Detect prompt for cursor sub process
Continued
